About Me

My name is Muhammad Azmi, graduated from Universitas Brawijaya as Bachelor of Computer Science (S.Kom) in 2019. Right now, I work as a full stack web developer at PT. Ukirama Solusi Indonesia. I have experience as a front end web developer at RuangUMKM, Gank Global, coding mentor at infiniteclass.id, freelancer lead developer at cataloq.co, and mobile app developer at PT. Aristi Jasadata. I am very passionate about web development and currently exploring front-end world extensively. I have a lot of experience in the field of software development for the past 2 years and have a good understanding of web application development, relational databases, and basic live production server deployment. I also love to share my progress and experiences when learning new things through my Medium channel.

Skills

- Ruby on Rails
- Javascript (Node.js)
- PostgreSQL
- Vue.js / Nuxt.js
- React / Next.js
- TailwindCSS
